

BLM 3590 PROJECT

You will prepare your projects with the obligations given below:

1. Please use the database whose link you have written on the Google sheet.
2. Please visualize your data with the appropriate chart.
3. Please calculate the descriptive statistics of your data.
4. Please divide your data into two or subsets and create a hypothesis, and test your hypothesis whose type is suitable for your data and your hypothesis.
5. Select two variables from your data, calculate the correlation and test the correlation that you found with the suitable hypothesis test.

You will upload your studies as a Project report to the Google forms whose access link that I will announce next week.

Please add your code (that you draw your chart) at the end of your report as appendix part.

Your report will be maximum 5 pages in total (including appendix).

You should upload your file until 04.01.2023 23.59, otherwise the system will be closed and the Project files sent by **EMAIL WILL NOT BE GRADED.**
