PURPOSE

The **International Symposium on Health Informatics and Bioinformatics, (HIBIT)**, now in its ninth year (HIBIT 2015), aims to bring together academics, researchers and practitioners who work in these popular and fulfilling areas and to create the much-needed synergy among medical, biological and information technology sectors. HIBIT is one of the few conferences emphasizing such synergy. HIBIT provides a forum for discussion, exploration and development of both theoretical and practical aspects of health informatics and bioinformatics and a chance to follow current research in this area by networking with other bioinformaticians.

SCOPE

The topics of the conference include but are not limited to:

Bioinformatics	Health Informatics
Genomics Transcriptomics Proteomics Epigenetics Protein Analysis and Structure Prediction Next Generation Sequencing Technology Comparative Sequence Analysis Systems Biology Translational Bioinformatics	Electronic Health Records and Standards Medical Imaging and Diagnostic Instrumentation Decision Support Systems and Computer Aided Diagnosis Evaluation Methods in Health Informatics Clinical Informatics and Hospital Information Systems Telemedicine and Mobile Applications Health Informatics (HI) Education Computational Neuroscience Security, Ethics and Privacy Data Mining and Knowledge Discovery in Health Informatics
